### PROFESSIONAL SUMMARY

---

Junior Full Stack Developer with around 1.5+ years of hands-on experience building web applications for fintech, e-commerce, and lending products. Skilled in **React.js, Next.js, TypeScript, Redux Toolkit, TanStack Query, Tailwind CSS, and REST API integration**, with working knowledge of **Node.js, Express.js, and MongoDB** on the backend. Currently contributing to multiple live products at UniBcomp Networks Private Limited, including an e-commerce platform, a fintech KYC and AePS portal, a payment gateway aggregator, and a SIM management system. Comfortable building responsive user interfaces, integrating APIs, and shipping production features in collaboration with senior engineers. Quick learner with a strong focus on clean, maintainable code and user experience.

### TECHNICAL SKILLS

---

<b>Languages</b>	JavaScript, TypeScript, HTML5, CSS3
<b>Frontend</b>	React.js, Next.js, Redux Toolkit, TanStack Query, React Hook Form, React Router, Tailwind CSS, Bootstrap, Material UI, Framer Motion
<b>Backend</b>	Node.js, Express.js, REST APIs, JWT Authentication, Axios
<b>Databases</b>	MongoDB, MySQL
<b>Tools</b>	Git, GitHub, Postman, Visual Studio Code, Vite, npm
<b>Deployment</b>	Vercel, Render, cPanel (Hostinger), Domain and SSL Setup
<b>Concepts</b>	Responsive Web Design, UI/UX Fundamentals, Component-Based Architecture, State Management, Form Validation, API Integration, Authentication Flows
<b>Soft Skills</b>	Problem Solving, Communication, Team Collaboration, Self-Learning, Adaptability

### WORK EXPERIENCE

---

**Junior Full Stack Developer** — UniBcomp Networks Private Limited, Gurugram *Sep 2025 – Present*

Contributing to multiple live products under the guidance of the senior development team. Focused on frontend development using React.js, Next.js, and TypeScript, with growing exposure to backend work.

#### UniBcomp.in — E-commerce Platform (Client and Vendor Portals)

- Contributed to the frontend of a multi-vendor e-commerce platform with separate buyer-facing and seller-facing portals, built using **React 19, TypeScript, Vite, and Tailwind CSS**.
- Developed responsive UI components for product listing pages, product detail pages, shopping cart, checkout flow, and vendor dashboard screens.
- Implemented client-side state management using **Redux Toolkit** and server-state caching with **TanStack Query**, and integrated REST APIs using Axios.
- Worked on payment gateway integration on the client side and handled form validation using **React Hook Form**, along with user feedback through toast notifications.
- Built features for PDF and image export of invoices and product details, and integrated barcode and QR code rendering for product identifiers.

#### BankMudraa.com — Fintech Platform for Retailers

- Contributed to the frontend of a fintech platform offering **AePS, DMT, BBPS, IRCTC, and PPI services** for retailers and shop owners, supporting multi-level user hierarchies such as Retailer, Distributor, and Super Distributor.
- Built UI screens for the **full KYC onboarding flow**, including Aadhaar and PAN capture, document upload, and verification status views.

- Developed retailer dashboard sections covering wallet balance, transaction history, service tiles, and commission and charge displays, integrated with backend APIs maintained by the senior backend team.
- Implemented role-based UI rendering so that each user level sees only the operational screens permitted for their role.

#### PayIn–PayOut — Payment Aggregator Platform

- Worked on selected frontend screens of a payment aggregator platform used for transaction approvals and settlement tracking.
- Built dashboard views for **transaction monitoring, settlement reports, and status tracking**, with filters, search, and pagination using TanStack Query.
- Assisted with UI for transaction lifecycle views such as initiated, approved, refunded, and settled states, and integrated the screens with REST APIs.

#### SIM Management System (Codename: Rapport) — Admin and MR Panels [In Progress]

- Currently building the **Admin Panel** and **MR (Manager) Panel** of a SIM management product using **React 19, TypeScript, Vite, Redux Toolkit, TanStack Query, and Tailwind CSS**.
- Implemented authentication using **JWT and cookie-based session handling**, along with protected routing using React Router v7.
- Built admin features for creating operators, defining service plans, and assigning plans to MR users, with form validation using **React Hook Form and Zod**.
- Added client-side image upload with compression before sending files to backend APIs, improving upload performance.

#### Junior Web Developer — KR CorpLink LLP (NBFC), Delhi NCR

*Jan 2025 – Jun 2025*

- Built the frontend of **LoanOne.in**, a loan application portal with a full KYC journey covering **Aadhaar verification, PAN verification, CIBIL score check, and bank statement collection**, using React.js and Next.js.
- Integrated third-party APIs for Aadhaar and PAN verification on the client side. CIBIL scores and bank statements were reviewed manually by the operations team.
- Managed staging environments on subdomains and collaborated with a freelance Laravel backend developer for API integration and bug fixing.
- Delivered **two live websites** (LoanOne.in and Altura Financials) and built a small library of reusable components that reduced repeat UI development time.

#### Web Developer Intern and Trainee — P2P Info System LLP, Delhi NCR

*Jul 2024 – Dec 2024*

- Worked in a small agile team on React.js based client projects, building page layouts and reusable components.
- Practiced frontend design using **Bootstrap and Material UI** and learned component composition, props, hooks, and basic state management.

#### PROJECTS (LIVE LINKS)

---

- **LoanOne (NBFC Loan Portal)** — [loanone.in](https://loanone.in). Full KYC and loan application flow built with React.js and Next.js.
- **UniBcomp** — [unibcomp.in](https://unibcomp.in). Multi-vendor e-commerce platform; contributing on both client and vendor portals.
- **BankMudraa** — [bankmudraa.com](https://bankmudraa.com). Retailer-facing fintech platform for AePS, BBPS, IRCTC, and similar services.
- **Janki Resort** — [jankiresort.in](https://jankiresort.in). Freelance project currently under active development.
- **Personal Portfolio** — [portfolio.sauravswaraj.com](https://portfolio.sauravswaraj.com). Showcase of personal projects including an E-commerce React Cart, Crypto App, Video App, and Portfolio UI.

#### EDUCATION

---

**Bachelor of Engineering, Mechanical Engineering** — SLIET, Punjab, India

*2021*

#### TRAINING & CERTIFICATIONS

---

- **MERN Stack Developer Training** — DUCAT Institute, Noida
